Allowable Subject Matter

1. Claims 1-56 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior arts of record do not anticipate or render obvious to one skilled in the art a polarizing plate comprising with an optical compensation film comprising a polarizing plate, an adhesive layer and an optical compensation film, laminated to one another, wherein an elastic modulus of the adhesive layer is not greater than 0.06 Mpa.
4. A polarizing plate with an optical compensation film comprising a polarizing plate, an adhesive layer and an optical compensation film, laminated to one another is known. However, the adhesive layer used to laminate the polarizer and the optical compensation film having the claimed elastic modulus is considered novel.
5. Norland Optical discloses several different type of adhesives for bonding.. Further, Cookson electronic disclose several thermoplastic adhesive pastes for use in a variety of electronic applications. Also the article, "Thermal Management Performance and Attachment Reliability Using Urethane Film Adhesives" teaches the use of adhesive having elastic modulus of 3.45 Mpa to 6.90 Mpa. Also, USPAT 6,582,789, USPAT 6,074,729 discloses the use of pressure sensitive adhesive sheet. Further, USPAT 6,600,529 and US 2002/0015807 (assigned to the same assignee) are related to polarizing plate used in a liquid crystal display wherein the surface of the polarizer includes a protective film (pressure sensitive adhesive layer). However, all the references alone or in combination with any other prior art references fail to teach or suggest the claimed adhesive having elastic modulus of not greater than 0.06 Mpa.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
